

To whom this may concern, I would like to voice my opinion regarding NAB's position with Satellite radio. I am a current subscriber to XM radio, and have found the traffic and weather channels, along with all the rest of XM's services to be simply, the greatest thing since peanut butter. Realizing the NAB could never capture this kind of market, their response is to ridicule and use their vast amounts of money, to try to keep anyone else from doing so. That's not the way capitalism works, but unfortunately, it's who has the largest pockets. Please don't let the NAB try and use their overbearing power to defeat, what they cannot produce. I love my XM radio's, and all that it has given to me, above and beyond regular programming. As long as I'm paying for what I want, The NAB have no right to tell me otherwise. LONG LIVE SATELLITE RADIO!!! DOWN WITH HR-4026!!!! Sincerely, Ted Dunevant.
